ENTITY	Vonar AI Inc.
UEI	MU9YZL34ZB83
CAGE	13GP2
SAM.GOV	Active registrant
LOCATION	DC metropolitan area, United States
WEB	vonar.ai

CONTACT

GENERAL	contact@vonar.ai
TEAMING	partnerships@vonar.ai
SUPPORT	support@vonar.ai

PROCUREMENT

- Direct award and simplified acquisition, including pilots scoped under the micro-purchase threshold.
- Teaming and subcontracting with primes on GSA MAS and NASA SEWP task orders.
- Commercial and nonprofit work under a master services agreement.

COMMERCIAL TERMS

- Firm-fixed-price or time and materials.
- Weekly burn and progress reports.
- Published service level agreement for supported systems.

AI implementation and modular open systems integration for government: software, sensors, cloud, and data, built and supported by senior U.S. engineers.

Vonar AI Inc. builds, modernizes, and operates systems for federal, state, and local agencies and for enterprise clients. One accountable team from requirement to operations.

CORE COMPETENCIES

Custom software and modernization

Public-facing portals, case management, APIs, and mobile. Incremental migration off legacy platforms without operational downtime.

Sensors and research systems

Complete scientific equipment supply: specification review, sourcing and procurement, sensor and data-acquisition integration, software configuration, verification against specification, and documented delivery with training.

AI implementation

Assistants, agents, and document processing that route work and support decisions, deployed inside the client boundary with evaluation and audit trails.

Modular open systems

Systems designed to MOSA with open, documented interfaces; sensors integrated to the SOSA Technical Standard where the program calls for it.

Cloud and DevSecOps

Landing zones, infrastructure as code, CI/CD, and observability on AWS, Azure, and Google Cloud, including government regions.

Data engineering and analytics

Pipelines, warehouses, and dashboards that turn operational records into decision-ready information.

Managed services and staff augmentation

Operations and maintenance, help desk, and embedded engineers under defined service levels.

DIFFERENTIATORS

- Senior engineers only. The people in the briefing do the work.
- Documentation as a deliverable: runbooks, as-built records, and hand-off training with every system.
- Verification before acceptance, with written test records.
- Transparent scope and spend; change orders written before work starts.

PAST PERFORMANCE

Project records, component lists, photographs, and measured results are provided with each quote and on request to contracting officers. Internal prototypes are labeled as such.

PLATFORMS

AWS GovCloud, Azure Government, Google Cloud, ServiceNow, Atlassian, Salesforce, Microsoft 365, Kubernetes, Terraform, Snowflake, Twilio, Okta.
